DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a personal care product in a pressurized container comprising a personal care formulation, a propellant, and a sorbant that has formed a gel with at least a portion of the propellant, classified in class 424, subclass 47.
 - II. Claims 21-26, drawn to a personal care product in a single compartment container comprising a personal care gel composition and a propellant, wherein substantially all of the propellant is either sorbed onto a sorbant or present in its gaseous phase, classified in class 424, subclass 47.

Claims 27-30 directed to a method of making a personal care product will be examined with the elected group.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a personal care formulation of Claim 1 does not have to be a gel formulation as required by Claim 21. The subcombination has separate utility such as shaving gel.

Art Unit: 1616

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

5. Claims 1-30 are generic to a plurality of disclosed patentably distinct species comprising:

(a) shaving products;

(b) antiperspirant products; and

(c) deodorant products,

which require a burdensome classification, and/or bibliographic, manual and computer search.

Accordingly, regardless of which group is elected, the Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1616

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
